Notes on the Proposed Committee
on Engineering Standards

1. The present Committee are to be continued

2. McGill has the following representatives on the Committee
(1) A Herdt Professor of Electrical Engineering
(2) J B Porter Professor of Mining Engineering
(3) R T Rutledge Professor of Chemistry
(4) A Stansfield Professor of Metallurgy

3. Toronto has only 1 representative
Prof. J. C. McLennan
Professor of Physics
who is not an Engineer.

It would appear only fair that Professor ~~McLennan~~ McLennan should remain as one of the representatives of the Advisory Council and Toronto should be allowed to choose their representatives without restriction

Angus - Mechanical
Leonard - Civil
Bain - Chemical Engg.
Peacock - Electrical Engg.

December 30th, 1918

Acting General Superintendent,
Operating Department,
Canadian Explosives Limited,
Montreal.

Dear Sir:

On behalf of the University I have to thank you for your letter of Dec. 20th in which you state that the Canadian Explosives Company has contemplated the endowment or partial support of scholarships in certain Canadian Universities. I am very glad to know that you have this purpose in view and I may assure you that in the University we shall welcome the establishment of any such scholarships. We have no permanent scholarships in Engineering, or in general Chemical work. The graduates of the University in Applied Science have raised a fund to induce students to enter Engineering but probably this is only temporary. I presume that your Company would have in view the establishment of such scholarships as would facilitate the education of young men in the various branches of Engineering and Chemical industry. In that case I would advise that these scholarships be granted on the basis of high attainment at entrance and that a small committee of the Faculty of Applied Science and of the Chemical Department of the University be appointed to pass upon all candidates who present themselves after having undergone the regular entrance examinations into the Faculty. The Scholarships

should be granted to the Board of Governors of the University of Toronto for such use in the University as you have mentioned, that is to say, Engineering and Chemical training. If there is any further information I can give I shall only be too happy to do so.

Yours sincerely,

President.
